

American University Sustainability Courses

Type	Level	Course Name	Number	Department	Description
Includes Sustainability	UG	Cost Acct & Strategic Cost Mgt	ACCT-345-001	Kogod: Accounting / Taxation	Concepts, tools and techniques focused on organizational value creation
Includes Sustainability	GR	Govt & Not-For-Profit Acct	ACCT-560-001	Kogod: Accounting / Taxation	Efficient and sustainable use of public funds us discussed.
Includes Sustainability	GR	Govt & Not-For-Profit Acct	ACCT-560-001	Kogod: Accounting / Taxation	Accounting for Government and Nonprofit Entities - it involves financial/budget issues facing governmental and nonprofit entities.
Sustainability Course	GR	Ethics in Business & Acct	ACCT-600-001	Kogod: Accounting / Taxation	Ethics in accounting and business from the corporate social responsibility model is presented.
Includes Sustainability	GR	Management Accounting	ACCT-609-D02	Kogod: Accounting / Taxation	Includes sustainability measures as part of balanced scorecard composition
Includes Sustainability	UG	American Dreams/American Lives	AMST-200-E01	American Studies	Introduction to American Studies and social justice
Includes Sustainability	UG	Poverty & Culture	AMST-240-002	American Studies	Poverty and Culture is a GenEd and community-based class. Students complete 20 service-learning hours with nonprofits of their choice. They then connect their hours with our class readings in discussions, a final paper and a presentation. Several students completed their hours with organizations devoted to alleviating food insecurity. We also discuss food insecurity, clean water and environmental racism in class sessions.
Includes Sustainability	UG	Activism and Social Media	AMST-340-003	American Studies	A block class with each session devoted to a different topic -- one of which included the environment. Student conduct research on topics of their choosing and then present on their work in the last class. Two out of 21 students selected topics related to sustainability.
Includes Sustainability	UG	Culture & Human Experience	ANTH-110-001	Anthropology	This course focussed on the ethnographic cross-cultural analysis. The course concerned itself with the diversity of perspectives and experiences in the world. Some major topics covered in the course related to age, disability, ethnicity, gender and gender identity, race, religion, sexual orientation, and social class.
Includes Sustainability	UG	Culture & Human Experience	ANTH-110-002	Anthropology	This course gave a general overview of the discipline of anthropology, with a focus on ethnography and cultural anthropology.
Includes Sustainability	UG	Introduction to Archaeology	ANTH-253-001	Anthropology	explored theories and methods archaeologists use to understand the human past
Includes Sustainability	UG	Anthropology of Tourism	ANTH-350-002	Anthropology	The focus is on the complex issues of tourism as a global industry and the long-range impact on the natural environment and alternative means to promote sustainability.
Includes Sustainability	UG	Ceramics Analysis and People	ANTH-496-001	Anthropology	Explores archaeological theories of ceramics production, consumption, and discard
Includes Sustainability	GR	Health, Care & Social Movements	ANTH-625-903	Anthropology	Explores key theories of social change and surveys historical and contemporary social movements, with a particular focus on the relationship between technological innovation, health, and social struggle. Students analyze historical and structural determinants of health and conceptualize movement-based action as a means of collectively caring for individuals and communities
Includes Sustainability	GR	Ceramics Analysis	ANTH-690-001	Anthropology	Explores archaeological theories of ceramics, production and consumption
Includes Sustainability	UG	Art: Studio Experience	ARTS-100-005	Art	The creative process as a means of examining the distance that exists between each other and the world. Sculpture segment focuses on an exploration and extension of the potential of material and meaning from detritus.
Includes Sustainability	UG	Exp Media Studio: Video/Photog	ARTS-470-001	Art	Community Engagement
Includes Sustainability	GR	Time-Based Studio	ARTS-670-001	Art	community engagement project involved.
Includes Sustainability	GR	Collage As Text	ARTS-690-001	Art	Recycling and recontextualizing imagery and content
Includes Sustainability	UG	Media On & Of the Arab World	AWST-396-001	Arab World Studies	This course will examine the main theories of the press and how these theories apply to the media in the Arab World. The course will trace the development of Arab Media from early periodicals in mid-nineteenth century to today's satellite stations and electronic media. Emphasis will be placed on the history of press, print and otherwise in the Arab World and influential satellite channels such as Al-Jazeera, Al-Arabiya, Al Mayadeen, MBC, BBC and other competing news channels to see how these outlets are shaping Arab public opinion and political perspectives.
Includes Sustainability	UG	Great Experiments in Bio	BIO-100-009	Biology	A intro to biology course for non-majors (GenEd course). It includes a brief intro to biology across all sub-disciplines.
Includes Sustainability	UG	General Biology II	BIO-210-004	Biology	A general biology course for all biology majors. It covers evolution, biodiversity and ecology.
Includes Sustainability	UG	Introduction to Ecology	BIO-323-001	Biology	Introduction to community structure and dynamics
Includes Sustainability	UG	The Molecular World	CHEM-100-006	Chemistry	Chemistry in all modern world aspects
Includes Sustainability	UG	The Human Genome	CHEM-205-001	Chemistry	Genetics in health and diseases
Includes Sustainability	UG	General Chemistry II	CHEM-210-006	Chemistry	General chemistry course involving electronchemistry and acids and bases.
Includes Sustainability	UG	Advanced Organic Chemistry	CHEM-490-001	Chemistry	synthetic chemistry and instrumental analyses
Sustainability Course	UG	Ion Exchange Cellulose Polymer	CHEM-490-002	Chemistry	Independent student research project to modify cellulose for use in polymer composites.
Sustainability Course	UG	Antimicrobial Oligochitosan	CHEM-490-003	Chemistry	Independent research project using chitosan (crab shells) as an antimicrobial agent
Sustainability Course	UG	CNC Directed AgNP Synthesis	CHEM-490-005	Chemistry	Independent student research project using cellulose to form silver nanoparticles.
Sustainability Course	GR	Experimental Chemistry I	CHEM-681-001	Chemistry	Teaches students how to conduct research project through the lens of a clay-polymer composite for water purification series of experiments.
Sustainability Course	GR	Experimental Chemistry II	CHEM-682-001	Chemistry	Students develop their own research project focused on clay-polymer composites for water purification applications.
Includes Sustainability	UG	Writing for Communication	COMM-200-011	Communication, School of	Beginning journalistic style writing class for all majors. Addresses the sustainability of the journalism industry.
Includes Sustainability	UG	Fundamentals of News Design	COMM-420-005	Communication, School of	This class will explore the worlds of publication design and visual storytelling. Students will learn how to design for news in print and online, and how good design and information display can help readers understand the stories that affect their everyday lives. I may be able to include a component regarding environmental concerns, transitions from print to online, etc.
Includes Sustainability	UG	Wash Journalism Semester I	COMM-450-001	Communication, School of	This introduces students to many of the innovators in journalism and communication in Washington to teach them what is happening during the transformation of journalism and give them ideas on how they can take part in their careers.
Includes Sustainability	UG	Comm, Culture & Environment	COMM-489-001	Communication, School of	Research and principles that inform public communication about science, technology, and the environment. Course topics and case studies include climate change, energy, stem cell research, food biotechnology, the environmental movement, science and religion, evolution, animal welfare, genetic medicine, pharmaceutical marketing, and nanotechnology.
Sustainability Course	GR	Environ Filmmaking for Pub TV	COMM-568-001	Communication, School of	Students create a film for broadcast about relevant environmental issues facing Chesapeake Bay
Includes Sustainability	GR	Int'l Investigative Reporting	COMM-607-001	Communication, School of	This graduate level course introduces young student journalists to the burgeoning world of international investigative reporting, and one or two of the semester classes addresses climate change, the degradation of the oceans, environmental racism issues in a geographical context, how to measure such things, etc.
Includes Sustainability	GR	In-Depth Journalism	COMM-619-001	Communication, School of	It combines the international history of investigative journalism with weekly thematic investigative themes and the environment and more specifically climate change-related issues are part of that.
Includes Sustainability	GR	Proseminar in Political Comm	COMM-628-003	Communication, School of	Some students are writing papers that address sustainability.
Includes Sustainability	GR	Creat. & Copyright: Vis Arts	COMM-690-N05	Communication, School of	this is not a course. I just filled it out to get to the next one.
Includes Sustainability	GR	Master's Portfolio Capstone	COMM-702-012	Communication, School of	Students produce independent project, some of which deal with sustainability
Includes Sustainability	UG	Create & Mine Social Media Com	CSC-490-001	Computer Science	The project aims to create an automated data collection tool to address gender inequality on social media platforms through data mining, vocabulary sorting/trend creating an feminist analysis.
Includes Sustainability	GR	Intro to Geographic Info Sys	CSC-610-001	Computer Science	Introduction to the concepts and methods of spatial data manipulation and transformation.
Includes Sustainability	UG	Macroeconomics	ECON-100-001	Economics	Environmental economics is among the topics addressed in this course.
Includes Sustainability	UG	Macroeconomics	ECON-100-E01	Economics	introduction to the basics of macroeconomics - including environmental economics
Sustainability Course	UG	The Global Majority	ECON-110-001	Economics	Econ-110 (The Global Majority) focuses on a variety of sustainable development issues as the about 85 percent of the world population living in developing countries face them.
Includes Sustainability	UG	Microeconomics	ECON-200-002	Economics	A core concept for Econ 2002 understanding how equilibrium is related to support for and sustainability of economic allocation.
Includes Sustainability	UG	Microeconomics	ECON-200-012	Economics	Using the price system to allocate scarce resources
Includes Sustainability	UG	Intermediate Microeconomics	ECON-300-002	Economics	One week on externalities and public goods
Includes Sustainability	UG	Intermediate Microeconomics	ECON-300-B01	Economics	Using the price system to allocate scarce resources

Includes Sustainability	UG	Economic History	ECON-318-001	Economics	This course addresses resource scarcity and environmental constraints throughout history. The course covers the varying institutional arrangements found in economies around the world. It includes a discussion of the impact of economic systems and institutions on environmental sustainability.
Includes Sustainability	UG	Comparative Economic Systems	ECON-351-001	Economics	The focus of this course will be an exposition and evaluation of recent macroeconomic policies in developing countries. Macroeconomic policies comprise of fiscal policy, monetary policy, exchange rate policy, and trade policy. The course also analyzes various economic sustainability issues, like for example, debt sustainability.
Includes Sustainability	UG	Macroeconomics of Econ Devel	ECON-363-F01	Economics	The relationship between economic activity and the natural environment; the meaning and implications of sustainable development. Includes environmental protection, resource conservation, evaluation of environmental costs and benefits, and optimal management of natural resources. Also compares different policy approaches to regulating pollution and the exploitation of common property resources.
Sustainability Course	UG	Economics of Environmental Pol	ECON-379-001	Economics	One week on externalities and public goods
Includes Sustainability	UG	Inter Microecon with Calculus	ECON-400-001	Economics	The course helps students produce a substantial research project in economics. Environmental economics issues may be chosen if students wish.
Includes Sustainability	UG	Senior Research Seminar	ECON-480-002	Economics	Saudi fiscal budget
Includes Sustainability	UG	Saudi Arabia Fisc State Budget	ECON-490-002	Economics	This course examines the key issues related to what is typically referred to as public economics or public finance. We will show that the role of government is largely due to market failures and equity considerations.
Includes Sustainability	GR	Public Economics	ECON-541-702	Economics	Economic Theory is a one-semester introduction to micro and macroeconomics. It includes discussion of externalities, including environmental issues, and policies to mitigate environmental damage or promote sustainability.
Includes Sustainability	GR	Intro to Economic Theory	ECON-603-001	Economics	I've added a section of this course that has to do with resource scarcity and the environment.
Includes Sustainability	GR	Economic Thought	ECON-620-001	Economics	The main objective of this course is to provide an overview of development experiences of developing countries since the end of World War II. While these development experiences focus initially on economic aspects, development economics cannot be grasped without also understanding the social, political, institutional and environmental dimensions of development.
Includes Sustainability	GR	Survey of Economic Development	ECON-661-001	Economics	This course explores the gender dimensions of economic issues including household division of labor, gender norms in labor markets and households, unpaid work, poverty, and public policies
Includes Sustainability	GR	Gender Persp Econ Anlys: Micro	ECON-674-001	Economics	Looks at governance financial crises
Includes Sustainability	GR	Governance Financial Crisis	ECON-690-N02	Economics	A review of the economists who have contributed to the development of economic thought.
Includes Sustainability	GR	Economic Thought	ECON-690-N03	Economics	This course explores the intersection of education and international development. We examine education as a socializing agent, a liberating tool of social justice, and an engine of change. Special attention is given to the multiple roles of education in social, economic, political, and human development in the developing world.
Includes Sustainability	UG	Education for Int'l Devel	EDU-285-003	School of Education	Students are taught key teaching tactics and topics that should be integrated into a strong classroom setting. Topics are deeply explored and then students visit multiple classrooms throughout the area to investigate the use (or non-use) of these concepts.
Includes Sustainability	UG	Field Exper: Observ & Analysis	EDU-321-001	School of Education	Hybrid course to teach graduate education students about integrating technology into their pedagogical approaches.
Includes Sustainability	GR	Uses of Technology in Educatn	EDU-616-902	School of Education	Federalism and State/Local Policies including education, social welfare, health, environment,
Includes Sustainability	GR	State and Local Management	EDU-696-001	School of Education	The course explores the topics of biodiversity and conservation, ecology and evolution, population dynamics, nutrient cycling, and ecosystems resources.
Includes Sustainability	UG	Sustainable Earth	ENVS-150-001	Environmental Science	introductory course of environmental issues
Includes Sustainability	UG	Sustainable Earth	ENVS-150-001	Environmental Science	This course, which includes a weekly laboratory, covers the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world; to identify and analyze environmental problems; and to evaluate potential solutions. The course explores the topics of biodiversity and conservation, ecology and evolution, population dynamics, nutrient cycling, and ecosystems resources.
Includes Sustainability	UG	Sustainable Earth	ENVS-150-003	Environmental Science	An overview of the key ecological, chemical, and physical concepts, principles, and processes that underlie the major natural resource questions currently under public discussion, with a focus on energy and climate. Students examine the pros and cons of various sources of energy (coal, oil, natural gas, nuclear, hydropower, wind, biomass, tidal, and geothermal) within the framework of sustainable development, including its environmental, economic, and social dimensions
Sustainability Course	UG	Energy and Resources	ENVS-220-001	Environmental Science	An overview of the key ecological, chemical, and physical concepts, principles, and processes that underlie the major natural resource questions currently under public discussion, with a focus on energy and climate. Students examine the pros and cons of various sources of energy (coal, oil, natural gas, nuclear, hydropower, wind, biomass, tidal, and geothermal) within the framework of sustainable development, including its environmental, economic, and social dimensions
Sustainability Course	UG	Energy and Resources	ENVS-220-B01	Environmental Science	An overview of the key ecological, chemical, and physical concepts, principles, and processes that underlie the major natural resource questions currently under public discussion, with a focus on energy and climate. Students examine the pros and cons of various sources of energy (coal, oil, natural gas, nuclear, hydropower, wind, biomass, tidal, and geothermal) within the framework of sustainable development, including its environmental, economic, and social dimensions
Sustainability Course	UG	Energy and Resources	ENVS-220-B02	Environmental Science	This course covers the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems, to critically examine the relative risks associated with these problems, and to evaluate potential solutions. The course explores the topics of water and air pollution, solid waste, weather and climate, energy, and regulations and policy in the context of sustainability.
Sustainability Course	UG	Living in the Environment	ENVS-250-001	Environmental Science	GenEd course that covers air and water pollution, waste, energy options, sustainability
Sustainability Course	UG	Living in the Environment	ENVS-250-002	Environmental Science	This course covers the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems, to critically examine the relative risks associated with these problems, and to evaluate potential solutions. The course explores the topics of water and air pollution, solid waste, weather and climate, energy, and regulations and policy in the context of sustainability.
Sustainability Course	UG	Living in the Environment	ENVS-250-002	Environmental Science	This course covers the scientific principles, concepts, and methodologies required to understand the interrelationships of the natural world, to identify and analyze environmental problems, to critically examine the relative risks associated with these problems, and to evaluate potential solutions. The course explores the topics of water and air pollution, solid waste, weather and climate, energy, and regulations and policy in the context of sustainability.
Sustainability Course	UG	Living in the Environment	ENVS-250-002	Environmental Science	This course examines conservation issues, especially as they relate to conservation of biodiversity. The course covers early conservation writing, the development of tools that are used in conservation, and the status of biodiversity.
Includes Sustainability	UG	Conservation	ENVS-300-001	Environmental Science	Covers topics pertaining to public health and environmental issues including water and air
Includes Sustainability	UG	Environmental Health	ENVS-324-001	Environmental Science	Marine ecology course
Sustainability Course	UG	Marine Ecology & Conservation	ENVS-396-001	Environmental Science	Survey of environmental science- population, agriculture, toxic materials, air and water pollution, global warming/climate change, and energy
Sustainability Course	UG	Environmental Science I	ENVS-410-001	Environmental Science	Decadal change in seagrass beds due to coastal development and climate change
Includes Sustainability	UG	Seagrass Habitat Mapping	ENVS-490-001	Environmental Science	Effect of environmental change on sea life
Includes Sustainability	UG	Study of Foraminifera	ENVS-490-002	Environmental Science	Student projects to increase sustainability on campus
Includes Sustainability	UG	Senior Capstone Environ Stds	ENVS-492-001	Environmental Science	Using satellites and aerial imagery to quantify environmental change, mostly land cover change.
Includes Sustainability	UG	Remote Sensing	ENVS-496-001	Environmental Science	

Includes Sustainability	GR	Energy	ENVS-505-001	Environmental Science	General overview of sources of energy and energy utilization with a focus on the relevant physical concepts, quantification and an emphasis on sustainability. Includes the definition of work, energy, and power; an examination of thermodynamics; different forms of energy and their inter conversion; fossil, nuclear and alternative energy sources; and energy efficiency and conservation.
Includes Sustainability	GR	Biogeochemistry	ENVS-520-001	Environmental Science	Earth as a dynamic planet; two major energy systems: hydrologic and tectonic systems. The relationship between geological changes and human activities: human activities change geological materials and processes on the earth, and natural processes and events affect society.
Includes Sustainability	GR	Water Resources	ENVS-670-001	Environmental Science	A study of the availability, quality, dynamics, and cycles of water. Emphasizes the hydrologic cycle and relevant atmospheric processes, subsurface movement of water, floods and droughts, drainage basin analysis, and factors affecting water quality.
Includes Sustainability	GR	Geochemistry of Urban Waters	ENVS-690-001	Environmental Science	Independent research on effect of urban geology on chemistry of natural waters (Anacostia)
Includes Sustainability	GR	Ms Thesis: Guam Foraminifera	ENVS-690-001	Environmental Science	Population genetics
Includes Sustainability	GR	Biology of Insects	ENVS-696-002	Environmental Science	Diversity, ecology, and economic impact of insects
Includes Sustainability	GR	Master's Thesis Research	ENVS-797-001	Environmental Science	Impact of environmental change on marine life
Includes Sustainability	GR	Game Research Methods	GAME-610-001	Game Design	Course is on how interactive media can address social issues, and that includes some talk of environmental campaigning.
Includes Sustainability	UG	Visual Communication Design	GDES-200-002	Art	Most projects were submitted online and all project descriptions were online
Includes Sustainability	UG	Digital & Emerg Media Design I	GDES-220-002	Art	This course provides an overview of interaction design and web development
Includes Sustainability	UG	Design for Print: Digitl/Analog	GDES-310-001	Art	I put all materials online.
Sustainability Course	UG	Kinetic & Sequential Graphics	GDES-325-001	Art	All materials were put online and all projects were submitted online.
Includes Sustainability	UG	Interactive Experience Design	GDES-425-001	Art	This course examines experience design in depth, addressing ways of creating meaning through technology and interaction. It aims to locate design practice within larger cultural and social contexts.
Includes Sustainability	UG	Imagining the Future	GNEE-110-004	Art	This was an interdisciplinary class in film, literature, and popular culture, with texts spanning the 20th and 21st centuries. In addition to historical materials about war, nuclear threat, and the atom bomb in the 1930s, 40s, 50s, and 60s, we studied contemporary questions of sustainability and climate change in apocalyptic narratives, in climate fiction and film. Students researched topics about the future which included sustainability questions, such as the future of food, transportation, water use, refugee issues, and global questions of injustice.
Includes Sustainability	UG	Who is DC?: Local Identities	GNEE-140-002	Art	Sustainability in the sense of neighborhood social fabric
Includes Sustainability	UG	Researching Cities	GNEE-230-002	Art	Trains students in basic research skills in the interdisciplinary field of Urban Studies, which includes urban sustainability dimensions.
Includes Sustainability	UG	Politics in Developing World	GOVT-231-001	SPA: Government	This course looks at the politics of the developing world through a comparative lens.
Includes Sustainability	UG	Political Conflict	GOVT-235-003	SPA: Government	Examines political change, social movements, and resistance and addresses some conflicts which come from environmental degradation.
Includes Sustainability	UG	Political Conflict	GOVT-235-F01	SPA: Government	Consideration of political conflict and its causes, from revolution to war.
Includes Sustainability	UG	Middle East in Comp Perspect	GOVT-349-001	SPA: Government	A look at various issues, challenges which confront Middle Eastern states and societies, including urbanization and development challenges
Includes Sustainability	UG	Pipeline Research: Bravo Group	GOVT-490-008	SPA: Government	Everything done online.
Includes Sustainability	GR	Research Design	GOVT-615-001	SPA: Government	This course teaching students how to write research designs. A few of the examples included discussion of environmental sustainability.
Includes Sustainability	GR	Gov Regulation & Deregulation	GOVT-627-001	SPA: Government	Explores the interface of business and government regulation, including maximizing economic activity at the lowest achievable social (including environmental) costs; emphasis is on controlling the externalities of production through efficient regulation.
Includes Sustainability	GR	Political Comm Proseminar	GOVT-690-001	SPA: Government	Some students are writing papers that deal with sustainability.
Sustainability Course	GR	Standrds/Syst in US Hlth Care	HCS-600-702	Healthcare Management	Intro HCM course about healthcare issues in the US. Evaluation of the U.S. health care delivery system and impacts on health care quality, cost, and access.
Includes Sustainability	UG	Climate Chng Sci/Politics/Pol	HNRS-200-001	University Honors/Scholars	The course studies the politics and policy of climate change and has much to do with environmental sustainability.
Includes Sustainability	UG	Climate Chng Sci/Politics/Pol	HNRS-200-003	University Honors/Scholars	The course studies the politics and policy of climate change and has much to do with environmental sustainability.
Includes Sustainability	UG	Advanced Reader Book Database	HNRS-498-004	University Honors/Scholars	A completely online course developed as an honors capstone for elementary education. [former honors program] Not slated to be taught or advised again.
Includes Sustainability	UG	Lifetime Health & Fitness	HPRM-200-002	Health/Fitness	Lifetime health and fitness focuses on a variety of wellness concepts including physical activity, nutrition, stress management, and health policies that affect people over the lifespan.
Includes Sustainability	UG	Introduction to Nutrition	HPRM-205-007	Health/Fitness	This course addresses basic information about essential nutrients and their functions in the body as well as known and hypothesized relationships between diet and chronic disease. The course also addresses the U.S. government's nutrition guidelines, nutrition myths, food labeling, digestion, and weight management, and enables you to make informed decisions about your nutritional requirements and food choices.
Includes Sustainability	UG	Introduction to Nutrition	HPRM-205-008	Health/Fitness	This is a general education science course which discusses the science of nutrition including the scientific structure and function of carbs, fats and proteins. The course also discusses the USDA Dietary Guidelines and the Dietary Reference intakes. Throughout the course is a focus on the trend of obesity in the United States as well as the increase in Heart Disease, Cancer, Stroke, Diabetes, Hypertension. Students discuss these topics in the discussion forums after viewing current and relevant information on the overall health of the country. One assignment focuses on their genetic tree and when unknown they then discuss those aforementioned vital statistics. So, we definitely discuss sustainability in terms of health, well ess, diet and its effect on the country.
Includes Sustainability	UG	Introduction to Nutrition	HPRM-205-009	Health/Fitness	Sustainability is discussed as a factor that was considered in the development of the 2015-2020 Nutritional Guidelines for Americans, which we study in depth. It is also encouraged as a topic for individual research projects.
Includes Sustainability	UG	Strategies in Stress Managemnt	HPRM-250-010	Health/Fitness	stress as a public health issue..how the environment can be both a risk and protective factor
Sustainability Course	UG	Total Body Conditioning/Mma	HPRM-490-002	Health/Fitness	A high intensity, Muay Thai and Mixed Martial Arts (MMA) based conditioning course, which focuses primarily on the conditioning and striking applicable in Muay Thai, MMA, and self-defense. Students learn basic striking and defensive techniques while applying them via drilling, clinching (stand-up grappling), and sparring
Includes Sustainability	GR	Global Nutrition	HPRM-535-001	Health/Fitness	Course focuses on health, but we discuss inequity, malnutrition, food insecurity and the effects of climate change and other environmental events on food systems.
Includes Sustainability	GR	Health Communication	HPRM-641-702	Health/Fitness	This course addresses distinct forms of delivering health promotion messages to consumers, professionals, and large groups through various communication methods and social marketing. The course is divided into three modules, covering health coaching, mass health communication, and consumer health writing and public speaking. Students have the opportunity to coach individuals, advocate for a health issue on Capitol Hill, or give a presentation on a health-related topic.
Includes Sustainability	GR	Research Methodology	HPRM-681-001	Health/Fitness	sustainability included in research methods
Sustainability Course	UG	Sustainability & Global Strat	IBUS-340-001	Kogod: International Business	the whole course is dedicated to sustainability
Includes Sustainability	UG	Global Emerging Markets	IBUS-350-001	Kogod: International Business	we have several sections related to sustainability.
Includes Sustainability	GR	Manager in International Econ	IBUS-618-001	Kogod: International Business	Course that provides students with an understanding of the global environment in business decision making.
Includes Sustainability	GR	Manager in International Econ	IBUS-618-011	Kogod: International Business	This class covers sustainability in week 6 as part of a review of strategy and structure of the multinational entity in the context of cultural influences.
Sustainability Course	GR	Social Sustainability Strategy	IBUS-641-001	Kogod: International Business	the whole course is on sustainability
Includes Sustainability	GR	Global Project Experience	IBUS-687-002	Kogod: International Business	Global consulting projects for MBA students, including international engagements with sustainability elements
Includes Sustainability	GR	Global Consulting Supplement	IBUS-690-002	Kogod: International Business	Global consulting projects for MBA students; come projects have a sustainability component
Sustainability Course	GR	Int'l Dimen in Mgmt: Study Abr	IBUS-744-001	Kogod: International Business	This was a graduate study abroad course in which we studied both the socio-economic and environmental sustainability aspects of Denmark and Sweden.
Includes Sustainability	UG	AU Scholars Rsrch Lab	IDIS-196-002	DAA / Sr. Vice Provost	Sustainable agriculture in Cuba
Sustainability Course	UG	AU Scholars Rsrch Experience	IDIS-196-002	DAA / Sr. Vice Provost	Experiential component course to accompany ENVS-250
Includes Sustainability	UG	AU Scholars Rsrch Experience	IDIS-196-006	DAA / Sr. Vice Provost	Companion piece to the Cross-Cultural Course - similar description.

					The lab is part of the Cross-Cultural Communications course and attempts to inculcate an understanding of multiple viewpoints on various issues. One issue which has been a focus of the course is different understandings of the interaction between human beings and the environment - views of humans IN the environment, or as a PART OF the environment are discussed, as well as what implications that might then have for productive dialogue on issues of sustainability.
Includes Sustainability	UG	AU Scholars Research Lab	IDIS-196-007	DAA / Sr. Vice Provost	
Includes Sustainability	UG	Production/Operation Mgmt	ITEC-355-002	Kogod: Info Technology	Teaches concepts on business operations, process analysis and improvement, supply chain management and quality management.
Sustainability Course	GR	Management Information Syst	ITEC-616-025	Kogod: Info Technology	The course governs an overview of IT systems and their role in business. It teaches management principles of IT organization and technology sustainability, particularly emergent technologies, that impact the competitiveness and profitability of business. It, also, addresses the critical topics of innovation, talent, and impact on business performance. The course, also, includes ROI, and financial analysis of IT projects involving change and emergent technologies.
Sustainability Course	UG	Introduction to Law	JLC-101-004	SPA Justice, Law / Criminology	In this course we looked at how law is used to make social changes
Includes Sustainability	UG	Justice and Public Policy	JLC-309-001	SPA Justice, Law / Criminology	The course covered public policy related to criminal justice including issues of sustainability.
Sustainability Course	UG	Corrections & the Constitution	JLC-332-001	SPA Justice, Law / Criminology	The class teaches students about prisoners' rights by examining the 4, 5, 6, 8 Amendments and the areas impacted by incarceration
Sustainability Course	UG	The Death Penalty and the Law	JLC-444-002	SPA Justice, Law / Criminology	Teaches the students about death penalty litigation via Supreme Court cases and life on death row.
Sustainability Course	UG	Race Issues in Justice	JLC-496-003	SPA Justice, Law / Criminology	This course deconstructs issues of race through the lens of social change and civil rights.
Sustainability Course	GR	Race & Justice in America	JLC-638-001	SPA Justice, Law / Criminology	This course studies the history or race as a social construction and the impact in American civil rights and social justice application.
Sustainability Course	GR	U.S. Policing	JLC-643-001	SPA Justice, Law / Criminology	An examination of all aspects of the U.S. Policing model, including organization, leadership, management, policies and procedures, training, technology and recruitment/retention.
Sustainability Course	GR	The Death Penalty	JLC-686-001	SPA Justice, Law / Criminology	Graduate class that examines various issues related to the death penalty and the current use of it
Includes Sustainability	UG	Business 1.0	KSB-100-003	Kogod School of Business	Introduction to business in all aspects to provide a wide baseline of all disciplines
Includes Sustainability	GR	Managerial Acct & Operatns Mgt	KSB-631-020	Kogod School of Business	includes sustainability measures as part of balanced scorecard composition
Includes Sustainability	UG	Finite Mathematics	MATH-150-004	Mathematics / Statistics	We'll begin by discussing propositional calculus. Propositional calculus provides a concise way of handling a mathematical object known as a statement. Then we will develop a naive set theory by beginning with a discussion of simple sets, and thinking about how complex sets are built from such simple objects. We will also discuss combinatorics. Many of the sets we'll discuss have a finite size (we'll have to give a description of what this means). And there are also various constructions (for lack of a better term) of new sets which are derived from our simple sets in a predictable way. In such cases, it is possible to determine how many objects are in the derived sets. We will notice that some of our sets are finite in the sense that the set and the object that the set contains bear some relationship to reality. For example: one can consider the set of all possible outcomes in some financial transaction where the outcome isn't entirely known in advance. In situations like these, it makes sense to be able to say something about the likelihood of each outcome. We'll do this in cases where the sets of outcomes have finite size, and
Includes Sustainability	UG	Great Ideas in Mathematics	MATH-154-011	Mathematics / Statistics	We discuss green design in this course and biomimicry, as well as methods to live more sustainably. This includes debates and discussions.
Includes Sustainability	UG	Elem Mathematical Models	MATH-155-002	Mathematics / Statistics	Study of mathematical subjects including linear, quadratic, polynomial, rational, exponential, and logarithmic functions, in the context of difference equations models.
Sustainability Course	UG	Global Corporate Citizenship	MGMT-201-002	Kogod: Management	This course covered the many areas of Corporate Social Responsibility and Sustainability, both socio-economic and environmental.
Includes Sustainability	UG	Global Corporate Citizenship	MGMT-201-003	Kogod: Management	two chapters about Sustainability
Sustainability Course	UG	Global Corporate Citizenship	MGMT-201-005	Kogod: Management	This course emphasizes how the best-run businesses are attentive to the interests of all stakeholders; there is a particular emphasis on environmental issues.
Includes Sustainability	UG	Global Corporate Citizenship	MGMT-201-006	Kogod: Management	Undergraduate course on global corporate citizenship; coverage includes CSR and sustainability
Includes Sustainability	UG	Global Corporate Citizenship	MGMT-201-007	Kogod: Management	Core Gen ed class that examines the actions that firms take to be more sustainable.
Sustainability Course	UG	Global Sustainability	MGMT-230-001	Kogod: Management	This inter-disciplinary course covered multiple aspects of both socio-economic and environmental sustainability, including a tour by the university's arboretum staff.
Includes Sustainability	UG	The Entertainment Industry	MGMT-301-001	Kogod: Management	The students learn about the different personnel in the film, television and music industries.
Includes Sustainability	UG	Global Entrepreneurship	MGMT-361-001	Kogod: Management	Business enterprises in countries all over the world
Sustainability Course	UG	Sustainability in Denmark	MGMT-390-002	Kogod: Management	This was the undergrad course that included study of the socio-economic and environmental aspects of Denmark and Sweden.
Includes Sustainability	UG	Board Composition	MGMT-390-003	Kogod: Management	Examines how composition of boards is related to firm social and financial performance.
Includes Sustainability	UG	Entrepreneurship & Development	MGMT-390-007	Kogod: Management	Examines the intersection of entrepreneurship and development with a focus on policy.
Sustainability Course	UG	Norway: Nonprofit Entreprnshp	MGMT-396-003	Kogod: Management	Focused on how to help nonprofits develop sustainable business plans.
Includes Sustainability	UG	Norway: Corporate Entreprnshp	MGMT-396-004	Kogod: Management	Includes a focus on sustainable farming in the fishing sector; works with Marine Harvest.
Sustainability Course	UG	Sustainable Prod/Purchasing	MGMT-442-001	Kogod: Management	project.
Includes Sustainability	UG	Business Policy and Strategy	MGMT-458-004	Kogod: Management	Strategic planning of enterprises, capstone course for business majors that integrates earlier classes to achieve general management perspective
Includes Sustainability	UG	Business Policy and Strategy	MGMT-458-005	Kogod: Management	Capstone strategy course for undergraduates
Sustainability Course	UG	Sustainability Metrics/Reprtnrg	MGMT-496-A01	Kogod: Management	This was the undergraduate course in the multiple metrics, standards, and certifications in sustainability, such as GRI, LEED, and Benefit Corporations.
Includes Sustainability	GR	Ethics, Social Respon & Govern	MGMT-635-N01	Kogod: Management	This is a business ethics course emphasizing how the best-run businesses are attentive to the interests of all stakeholders.
Sustainability Course	GR	Water, Energy, Sustainable Ent	MGMT-643-001	Kogod: Management	Through case studies, group projects, technology tours, and meetings with government and business leaders, students learn about global water challenges and develop strategic frameworks for addressing them. Topics include water reuse and sustainability, water policy, corporate responsibilities and strategies for investing in the water sector.
Sustainability Course	GR	Sustainability Metrics	MGMT-690-002	Kogod: Management	This graduate course covered the multiple metrics, standards, and certifications in the sustainability field, such as GRI, LEED, and Benefit Corporations
Includes Sustainability	UG	Marketing & Business for Comm	MKTG-250-001	Kogod: Management	When discussing the "product" and the promotional aspects of marketing I stress the importance of sustainability and customers increasingly wanting to get reassured re sustainability practices.
Includes Sustainability	UG	Consumer Behavior	MKTG-301-002	Kogod: Management	Theories of consumer behavior often involve how consumption decisions can and should take into account the societal and environmental impact
Includes Sustainability	UG	Advertsnrg & Marketng Comm Mgt	MKTG-411-002	Kogod: Management	Sustainability as a smart marketing practice
Includes Sustainability	UG	Advertsnrg & Marketng Comm Mgt	MKTG-411-002	Kogod: Management	A class project involved a case competition where the client was Mothers Against Drunk Driving and the students created a fund raising campaign for them.
Includes Sustainability	UG	Brand Management	MKTG-421-002	Kogod: Management	Students explore brand-building and brand management for products, services, and organizations. This highly-interactive course focuses on the strategies decisions and challenges faced by brand managers. Emphasis is placed on experience with proven strategies for building brands in the competitive marketplace, on the decisions and options faced by brand managers, and on the necessary tools to manage brands. Students construct the brand concept for a new advantage, create brand identity, and build brand equity over time.
Includes Sustainability	GR	Marketing Management	MKTG-612-001	Kogod: Management	The core and foundational aspects of marketing.
Includes Sustainability	GR	Marketing Management	MKTG-612-002	Kogod: Management	This course provides students with an introduction to current marketing management techniques
Includes Sustainability	GR	Digital Marketing	MKTG-690-N01	Kogod: Management	Marketing products online.
Includes Sustainability	GR	Integrated Marketing Comm	MKTG-763-001	Kogod: Management	Sustainability as a smart practice that companies use in their marketing efforts
Includes Sustainability	UG	Bioethics	PHIL-241-B01	Philosophy / Religion	This course explores a range of topics in bioethics such as surrogacy, race and medicine, medical error, and ability/disability. By looking at contemporary, philosophical works, popular magazine articles, and films we will investigate these controversial topics and gain deeper insight into how to think critically about these moral challenges.
Includes Sustainability	GR	Global Ethics	PHIL-693-001	Philosophy / Religion	Graduate level survey course of applied ethics in the area of global affairs

Includes Sustainability	GR	Seminar in Int'l Affairs	SIS-619-026	International Service, School	Discusses themes in international affairs, including environmental issues. Sustainable development is one of the topics discussed in a unit of study.
Includes Sustainability	GR	Int'l Peace & Confl Res Sem I	SIS-619-031	International Service, School	This course presents the main theoretical approaches to peace and mass violence. Students learn the history and underlying assumptions of explanations of peace and war including the interstate system, international organizations, fragile states, gendered societies, economic incentives, ideas, and psychological factors. This course can be taken after, prior to, or in conjunction with IPCR Seminar II. Students are expected to demonstrate competency in reading complex materials, in offering coherent written analysis, and in deploying different theories to critically and persuasively analyze given peace opportunities or armed conflicts.
Includes Sustainability	GR	Global Int'l Relations Theory	SIS-619-133	International Service, School	topics including international economic policy coordination, emerging capital markets, international environmental policy, political risk analysis, international relations of Japan, preventive diplomacy, United States and Cuba, and nonviolence.
Includes Sustainability	GR	Global Climate Change	SIS-620-001	International Service, School	global climate policy considerations that factor in UN negotiations, development, science, social, economic, finance, and political considerations at the global level.
Sustainability Course	GR	Building a Post-Carbon World	SIS-620-001	International Service, School	Practice-based course focused on transitioning to a low-carbon energy system
Includes Sustainability	GR	The Future of Environmentalism	SIS-620-002	International Service, School	topics include water; food and agriculture; climate and energy; policy analysis; sustainable design; comparative environmental politics; and environmental security.
Sustainability Course	GR	Sustainable Dsg/LEED Training	SIS-620-003	International Service, School	Our learning objectives: To understand and describe the methods and components of the design and operations of sustainable buildings; To know how a building becomes Leadership in Energy and Environmental Design certified; To be able to assist with sustainable design and/or LEED documentation and efforts; To become familiar with a variety of best global sustainable design practices and green building standards; To challenge existing sustainable development paradigms.
Includes Sustainability	GR	Urban Political Ecology	SIS-620-004	International Service, School	topics include water; food and agriculture; climate and energy; policy analysis; sustainable design; comparative environmental politics; and environmental security.
Sustainability Course	GR	Intro to Environmental Econ	SIS-620-A01	International Service, School	Economic issues related to the environment
Includes Sustainability	GR	Human Rights	SIS-622-002	International Service, School	Covers climate change and human rights.
Sustainability Course	GR	International Organizations	SIS-625-001	International Service, School	climate change and sustainable development are two weeks
Includes Sustainability	GR	Rural Development	SIS-635-004	International Service, School	Includes community-led conservation and climate change.
Sustainability Course	GR	Human Trafficking in Gbl Soc	SIS-635-005	International Service, School	This course is focused on tracking, analyzing and evaluation the human and development cost of human trafficking
Includes Sustainability	GR	Micropolitics of Development	SIS-636-001	International Service, School	The course focuses on understanding the role of social categories such as class, gender, race, ethnicity and other social issues that have an impact on development and therefore can determine the degree of sustainability of a development activity.
Includes Sustainability	GR	Mediating History	SIS-639-004	International Service, School	Competing interpretations of history play a central role in many inter-state and intra-state conflicts today. Conflict resolution practitioners, however, do not always possess the skills necessary for addressing history directly and constructively. Drawing upon recent studies in collective memory, critical historiography and discourse analysis, as well as the extensive experience of working with historical narratives in conflict settings, the course will introduce the participants to practical methods that help transform the role of history from one that perpetuates conflict into one that helps resolve it through building better understanding of the conflict dynamics, mutual identity needs and alternative ways forward.
Sustainability Course	GR	International Communication	SIS-640-003	International Service, School	Graduate gateway course to field of International Communication
Sustainability Course	GR	Int'l Communic/Cultural Policy	SIS-645-E01	International Service, School	Graduate course comparing communication & cultural policies of nations around the world

Includes Sustainability	GR	Governance, Democracy & Devel	SIS-647-001	International Service, School	Discusses good governance including how it impacts sustainability & environment.
Sustainability Course	GR	Women and Development	SIS-648-901	International Service, School	This is a course on gender and development. Focus is on analyzing the gendered construction of international development in its multi-faceted forms/development
Includes Sustainability	GR	Global Econ & Sustainable Dev	SIS-650-001	International Service, School	Special attention is given to NGO(including labor unions); private sector and government initiatives to make trade and investment more supportive of socially and environmentally sustainable development.
Includes Sustainability	GR	Global Econ & Sustainable Dev	SIS-650-001	International Service, School	Special attention is given to NGO(including labor unions); private sector and government initiatives to make trade and investment more supportive of socially and environmentally sustainable development.
Sustainability Course	GR	Environment and Politics	SIS-660-002	International Service, School	Intro course for students in Global Environmental Politics MA program
Sustainability Course	GR	Methods of Social Innovation	SIS-696-001	International Service, School	This course covers frameworks for understanding and tools for addressing challenges related to social, economic, and (if selected by the student) environmental sustainability.
Includes Sustainability	GR	Strategic Planning	SIS-730-011	International Service, School	Case studies for group projects include a homeless shelter and a community college.
Includes Sustainability	GR	Real World Strategic Planning	SIS-730-101	International Service, School	Case studies for group projects include a homeless shelter and a community college.
Sustainability Course	GR	Sustainable Peacebuilding	SIS-730-207	International Service, School	This course explores opportunities for social change, development, and peacebuilding using social enterprise models. Using case studies and real world experiences to examine different ways social enterprise can work inside and outside the existing humanitarian and development frameworks. Participants will gain working knowledge of why and how social enterprises can effectively impact development through interactive exercises, individual, and group work. Expect a creative, lively, and collaborative environment as we develop skills for employing social enterprises, understanding the "when, why, where, and whoâ€™, and impact.
Includes Sustainability	GR	Big Data & Text Mining	SIS-750-004	International Service, School	This course is an advanced graduate research methods seminar, attracting students from across campus; but it is taught entirely online. We have built into the course, a range of sustainable mechanisms (e.g., all online, no paper syllabus, all books available in Kindle), all of which are mentioned in the syllabus, and highlighted for their "Green" sustainability elements.
Sustainability Course	GR	U.S. Policy toward Egypt	SIS-793-015	International Service, School	It dealt with providing students with background knowledge of Egypt and then letting them explore and come up with policy recommendations that would improve US-Egyptian relations and help U.S. State Department officials deal with dilemmas and problems that they face in the security, political and economic realms in the relationship.
Sustainability Course	GR	ODA and Climate Change	SIS-794-001	International Service, School	SRP on development assistance related to climate change
Sustainability Course	GR	Thailand's Sufficiency Economy	SIS-795-006	International Service, School	Sustainable rural development in rural Thailand
Sustainability Course	GR	Climate Change & Afghan Econom	SIS-795-017	International Service, School	SRP on the effect of climate change on Afghanistan water sources
Includes Sustainability	GR	Human Rights & Reconciliation	SIS-795-051	International Service, School	This course explores the complexity and multiple dimensions of the relationship between reconciliation and justice in conflict and post conflict contexts. It also aims at developing a deeper understanding of the challenges and opportunities involved in applying and designing a reconciliation project in conflict and post-conflict contexts.
Includes Sustainability	GR	International Economics	SISG-764-002	International Service, School	International trade, economics and trade and global environment.
Includes Sustainability	GR	Conflict Assessment/Prevention	SISG-767-105	International Service, School	The course focuses on conflict prevention, the policy tools, actors, and examples of success and failure. Further, the course looks at conflict analysis: what types of conflict predominate, what are their causes, and how are policy responses crafted.
Includes Sustainability	GR	Conflict Assessment/Prevention	SISG-767-N202	International Service, School	Theories and cases of early warning, conflict assessment, and conflict prevention
Includes Sustainability	GR	Politics of Global Development	SISG-768-101	International Service, School	This course examines the field of international development, focusing on the history, theory, and current approaches toward alleviating poverty and global inequality. Students will focus especially on the impacts of development strategies on the environment and on the most vulnerable members of society. The course emphasizes critical analysis of the central assumptions and power relations that have influenced the field as well as the resulting discourses, policies, programs, and political arrangements.
Sustainability Course	GR	Sust Dev & Global Envir Policy	SISG-768-102	International Service, School	topics include theories and concepts in international development, global health, and sustainable environmental politics.
Includes Sustainability	GR	Global Health Politics/Policy	SISG-768-202	International Service, School	The course focuses on analyzing global health issues using social and political science frameworks and theories. More specifically, the course focuses on the challenges involved in responding to epidemics at the national and international levels, and the implications of health threats and burden of disease for governance, foreign policy, development policy, security, and human rights.
Includes Sustainability	GR	Foundations of Economic Devel	SISG-768-302	International Service, School	This course has three main aims: It introduces different ways to define and to measure economic topics include theories and concepts in international development, global health, and sustainable environmental politics.
Sustainability Course	GR	Sust Dev & Global Envir Policy	SISG-768-N101	International Service, School	environmental politics.
Includes Sustainability	GR	Global Health Politics/Policy	SISG-768-N202	International Service, School	The course focuses on analyzing global health issues using social and political science frameworks and theories. More specifically, the course focuses on the challenges involved in responding to epidemics at the national and international levels, and the implications of health threats and burden of disease for governance, foreign policy, development policy, security, and human rights.
Includes Sustainability	GR	Intro to Economic Theory	SISG-773-101	International Service, School	Micro and macro intro level theory course for IR masters students. We include topics on globalization, and externalities applications to global warming and pollution
Includes Sustainability	GR	Understanding Global Econ/Mkts	SISG-774-101	International Service, School	Provides a discussion of externalities and the economic approach to dealing with externalities -- an issue that is central for designing sustainability issues.
Sustainability Course	UG	Sustainable Devel & Design	SISU-102-N17	International Service, School	This American University course adds to your NSLC experience by introducing you to the concept of sustainable development. In this class, we will examine some of the major challenges driving the need for environmentally and socially sustainable engineering, and we will explore possible solutions. Some questions we will discuss are: What does it mean to design products that are good for people and for the planet? How can we apply sustainability principles to help us address social, environmental and economic problems, especially in developing countries? In this online course, we will combine your NSLC field trips and workshops with design exercises, media clips and lectures and consider the challenges of studying and practicing sustainability in the 21st-century world.
Includes Sustainability	UG	Global Public Health	SISU-102-N28	International Service, School	This course complements the NSLC program on Medicine and Health Care by utilizing an international perspective to analytically explore critical health issues. We will discuss topics of relevance in the 21st century for both the global North and South. Emphasis is placed on the political, social, economic, and technological underpinnings of health concerns and solutions.
Includes Sustainability	UG	World Politics	SISU-105-012	International Service, School	Weeks on the environment and sustainable development
Includes Sustainability	UG	World Politics	SISU-105-024	International Service, School	week on climate change and introduction to sustainable development

Includes Sustainability	UG	Globalization 3.0	SISU-106-002	International Service, School	environment
Includes Sustainability	UG	Global Cities	SISU-106-003	International Service, School	The aim of this course is to understand the dynamics and power of the global city, to understand cities in general in a globalized context, but most importantly to delve into the social, economic, and cultural narratives of the cities we will focus on each week. We will note the transitions underway in different cities in different development stages by observing the interrelated patterns of urban and economic development, trade, migration, and the presence of growing social inequalities; urban ecologies and sustainability; and urban form, culture, and identity.
Includes Sustainability	UG	War, Politics & Silver Screen	SISU-106-003	International Service, School	Using films and documentaries, examining various issues in the international system including the question of climate change.
Includes Sustainability	UG	From Bean to Brew	SISU-106-006	International Service, School	This is Firest Year Seminar on coffee - where coffee is stand in for a global commodity that itself is produced, moved and consumer through a series of systems and relationships that we understand as the international community. The focus of the course is on critical understandings of these relationships. A significant part of the course is understanding the potential roles coffee production plays in the debate on environmentally sustainable development at the local level, and how certain types of consumption might further some of those issues.
Includes Sustainability	UG	Apple in the Global Economy	SISU-106-010	International Service, School	First year seminar on Apple, Inc.
Includes Sustainability	UG	The Break-Up of Britain?	SISU-106-011	International Service, School	Role of Britain from empire to Brexit

					We live in a globalized world, where goods are produced and then shipped all over the world. Wal-Mart, with its worldwide reach and market power, represents the best and the worst of this global economy. Consumers love its everyday low prices while workers rail against its labor practices and environmentalists fight over whether it is doing enough to reduce its carbon footprint. While Wal-Mart paved the way, Amazon has continued to transform the way we think about consumption, work, community, and the world. In this course we examine the global supply chain from extraction of natural resources, to manufacturing, distribution, and retail. In this course, we analyze who are the winners and losers in a globalized economy, and think about how business practices, government policies, and consumer demands affect outcomes. Is the only outcome a race to the bottom where workers' rights are sacrificed and developing countries become host to factories that some call sweatshops? Is corporate social responsibility a solution? Is ethical shopping? To make the local-global connection we will visit a Wal-Mart store in downtown Washington, D.C. and evaluate its impact on the local community.
Includes Sustainability	UG	Globalizatzn: Winners & Losers	SISU-106-013	International Service, School	
Sustainability Course	UG	Environmental Ethics	SISU-106-023	International Service, School	Environmental dangers challenge the moral quality of our lives. They pose difficult choices that call for ethical reflection. How can we live morally upright lives in an age of environmental intensification? From where can we draw ethical insight to navigate our way through issues such as climate change, animal rights, and environmental injustice? This course explores the ethical quandaries facing humanity in a time of cascading environmental degradation. It introduces the main traditions of ethical inquiry and helps students understand how their own ethical intuitions might be challenged and refined in the process of applying these traditions to cases of environmental harm. While the course focuses on right and wrong action in environmental affairs, it goes beyond ethical decision-making. Moral choices have consequences for others and shape the quality of our interior lives. Thus, this course provides an opportunity for students to consider critically both what they would do in particular instances of environmental damage and, more generally, how to live ethically aware lives.
Includes Sustainability	UG	Intercultural Understanding	SISU-130-007	International Service, School	strategies for bridging cultural differences
Includes Sustainability	UG	Intercultural Understanding	SISU-130-008	International Service, School	Intercultural interaction and communication
Includes Sustainability	UG	Cross-Cultural Communication	SISU-140-019	International Service, School	strategies for bridging cultural differences
Includes Sustainability	UG	Cross-Cultural Communication	SISU-140-E01	International Service, School	Cross-Cultural Communication is a course designed to develop Realistic Cultural Empathy in our students, and give them the skills to interact effectively in an international and intercultural world. This is done through exposure to different modes of thinking, and different assumptions about human relationships both with each other and with other societies and the environment around them.
Includes Sustainability	UG	Peace, Global Sec & Conflit Res	SISU-210-005	International Service, School	There is one lecture (of 27) on environmental security and how it can be tackled.
Sustainability Course	UG	Contemporary Russia	SISU-216-002	International Service, School	This course is designed to give students knowledge and new insights into contemporary Russia. Topics include the issues of Russian history and its reflection nowadays; leadership and elections; foreign and domestic policy; territorial structure and population; law, economy and social injustice; role of the mass media and rise of the oligarchs; the war in Chechnya; anti-corruption protests; situation with Crimean Peninsula, international sanctions, Syria and other recent events in contemporary Russia.
Includes Sustainability	UG	Int'l Political Economy	SISU-220-001	International Service, School	Weeks on the environment and sustainable development

Includes Sustainability	UG	International Development	SISU-240-002	International Service, School	This is an introduction to international development that includes concepts of sustainability
Includes Sustainability	UG	International Development	SISU-240-006	International Service, School	I include readings on environment and development, and students often choose to write papers on
Sustainability Course	UG	Env Sustainblty/Global Health	SISU-250-001	International Service, School	We examine the social, political, economic, cultural, and ecological underpinnings and contested concepts of global environmental sustainability and health challenges, and learn and practice options for meaningful change.
Sustainability Course	UG	Env Sustainblty/Global Health	SISU-250-002	International Service, School	Protecting planetary health is among the most profound challenges facing humanity. Environmental dilemmas currently undermine the quality of life for many. As these intensify, they threaten not simply increasingly wider swaths of humanity but the very biophysical foundations of life on earth. This course introduces students to the socio-political dynamics of global environmental dilemmas. It explores the causes of environmental harm and the mechanisms of governance best able to respond. By focusing on the relationship between poverty and wellness, environmental justice, sustainable development, climate change, and environmental ethics, the course aims to provide an integrated understanding of environmental sustainability and global health.
Sustainability Course	UG	Env Sustainblty/Global Health	SISU-250-003	International Service, School	Explores international-level issues related to environmental and health outcomes.
Includes Sustainability	UG	Introduction to Human Rights	SISU-270-002	International Service, School	Covers human rights and the environment, and sustainable development.
Includes Sustainability	UG	Comparative/Global Governance	SISU-280-005	International Service, School	This course deals with how the international community - governments, international institutions, NGOs and private actors - handle broadly the governance of particular issues and manage international and individual responses to those issues. One major issue we discuss is sustainability, and particularly environmental issues (though which specific environmental issues a given class addresses is based more in what is currently in the news)
Sustainability Course	UG	Comparative/Global Governance	SISU-294-001	International Service, School	climate change and sustainable development are two weeks
Sustainability Course	UG	Sociocultural Field Research	SISU-306-021	International Service, School	Undergraduate introduction to field methods on sociocultural drivers of conflict
Sustainability Course	UG	Climate Policy Analysis	SISU-306-028	International Service, School	Study of climate change and climate policy options.
Includes Sustainability	UG	Breakfast in the Americas	SISU-324-001	International Service, School	When we wake up in the morning and eat breakfast, chances are that we give little thought to the origins of the coffee, sugar, bananas and other products we consume. How did they get to our breakfast table? Who picked the coffee beans? Who owns the banana plantation? What kind of lives do the sugar workers and plantation owners have and how have they changed over time? What happens to coffee farmers who migrate to the United States because they cannot make a living in their country? And what happens to the village they leave behind? How were Banana Republics created and what was the environmental impact of banana production? How did the relationship between United Fruit Company and the governments of Latin America and the United States in the 20th century affect Latin America? How effective have social movements been at addressing political and economic inequalities? These are some of the questions we explore in this course. In this course we adopt a multi-disciplinary approach, reading works by anthropologists, geographers, historians, political scientists, economists, and sociologists. We examine the political, economic, cultural, environmental, and social historical issues surrounding the commodities of coffee, sugar, and bananas. While emphasis is placed on the role these commodities have played in the historical development of this hemisphere, we also explore the political, economic, and social ramifications of globalization. As a response to globalization we consider fair trade, and social movements; we also look at the Cuban economic model. And we consider the national identity adopted by Latin American countries, exemplified by Carmen Miranda and Juan Valdez.
Sustainability Course	UG	Globaliztn, Human Traffckg & Dev	SISU-340-004	International Service, School	Examines issues of International Migration, globalization and the problems of human trafficking across the globe
Sustainability Course	UG	Gender and Development	SISU-348-001	International Service, School	The course analyzes the the multiple dimensions of human trafficking across the globe and evaluates its impact on international development and social justice issues of vulnerable populations.
Includes Sustainability	UG	Politics of Conservation	SISU-349-001	International Service, School	This is an elective course that analyzes conservation interventions, part of which are sustainability focused
Includes Sustainability	UG	Global Cities, Justice & Envir	SISU-349-001	International Service, School	topics focusing on the intersection of global inequality, development, environmental sustainability, and global health.
Includes Sustainability	UG	Politics of Population	SISU-349-002	International Service, School	I include lectures and readings on the relationship between population growth and environment, as well as on the relationship between migration and environment.

					Rotating topics including human geography, politics of population, international environmental politics, health in the developing world, and health communication.
Includes Sustainability	UG	Nature & Environmental Ethics	SISU-350-001	International Service, School	
Sustainability Course	UG	Sustainable Cities	SISU-350-001	International Service, School	In acknowledging the urgent demands of our urban present and future, this course (1) examines the social, economic, and environmental dimensions of contemporary cities; (2) makes the case for sustainable urban development -- focusing on considerations of social equity and activism -- as a way to mitigate the impacts of population growth, globalization, social exclusion, and the effects of climate change. We will explore what is, and what could be, by discussing how cities can respond to the pace and nature of urbanization through a consideration of many themes, including: urban spatial planning, power, urban environmental activism, housing, slums and slum typology, urban policing, urban economies, urban food systems, new paradigms for energy/water/waste infrastructure, and green building. We will consider how to measure sustainability and discuss the effectiveness of sustainability indicators. We will examine examples of social entrepreneurship and the power of information technology and social networks in political enfranchisement and the diffusion of ideas. We will also highlight the role of art and culture as a pivot for activism and change.
Includes Sustainability	UG	Overview of European Union	SISU-383-001	International Service, School	All sorts of EU policies including environment
Includes Sustainability	UG	Migration and Development	SISU-394-001	International Service, School	The intersection between the global migration of people and questions of economic and human development.
Includes Sustainability	UG	Innovation in World Politics	SISU-397-001	International Service, School	Topics covered included NGO involvement in global forestry regime as well as climate change.
Includes Sustainability	UG	Ethnic Cleansing and Genocide	SISU-419-011	International Service, School	Conflict - environment link explored in a number of case studies throughout the world
Includes Sustainability	UG	Peace and Social Justice	SISU-419-011	International Service, School	Whether it another U.S military invasion across the ocean or a domestic dispute across the living room, alternatives to violence do exist. The discussion-based class involves learning the skills to increase peace and decrease violence.
Includes Sustainability	UG	Rise of China & Global Economy	SISU-419-013	International Service, School	The course examined how rapid growth and development in China has affected the rest of the world economy.
Includes Sustainability	UG	Theory and Practice of the G20	SISU-419-022	International Service, School	Analysis, simulation and discussion of the main G20 negotiations over the last 10 years
Sustainability Course	UG	Sustainable Urban Development	SISU-419-026	International Service, School	Using Washington, DC as our urban laboratory and as the object of our class project, we will examine the concept and consequences of sustainable urban development and the notion, applied throughout the world today, of the triple bottom line "at best, a paradigm of abundant growth; at worst, a cruel lie; in reality, a desired but elusive balance of variables common to all cities. Our learning objectives are: 1. To understand the actors and forces in the drama of sustainable development, locally and globally; 2. Through field observation, review of key sources, and class discussion, to recognize the means, methods, and components of sustainable and adaptive urban planning and infrastructural planning; 3. To recognize and be able to combat the barriers to urban sustainability and capacity for adaptation; 4. To know, question, and be able to apply an integrated, triple-bottom line (economically beneficial, socially equitable, and environmentally healthy) approach to urban problems, through basic principles of sustainable urban planning; 5. To be able to quantify or measure progress towards urban well-being.
Includes Sustainability	UG	Bus, Globalization, Us Fr Pol	SISU-490-007	International Service, School	We live in a globalized world, where goods are produced and then shipped all over the world. Wal-Mart, with its worldwide reach and market power, represents the best and the worst of this global economy. Consumers love its everyday low prices while workers rail against its labor practices and environmentalists fight over whether it is doing enough to reduce its carbon footprint. While Wal-Mart paved the way, Amazon has continued to transform the way we think about consumption, work, community, and the world. In this course we examine the global supply chain "from extraction of natural resources, to manufacturing, distribution, and retail. In this course, we analyze who are the winners and losers in a globalized economy, and think about how business practices, government policies, and consumer demands affect outcomes. Is the only outcome a race to the bottom where workers' rights are sacrificed and developing countries become host to factories that some call sweatshops? Is corporate social responsibility a solution? Is ethical shopping? To make the local-global connection we will visit a Wal-Mart store in downtown Washington, D.C. and evaluate its impact on the local community.
Includes Sustainability	UG	Critical Social Thought	SOCY-215-003	Sociology	Theoretical and philosophical course on critical social thought.
Includes Sustainability	UG	Intro to Social Research	SOCY-320-001	Sociology	An introduction to social research.
Includes Sustainability	GR	Social Movements/Social Change	SOCY-530-001	Sociology	Discusses historical and contemporary social movements including environmental ones
Sustainability Course	UG	The American Constitution	SPA-220-001	Public Affairs, School of	In this course we looked at how decisions of the US Supreme Court has influenced social changes
Includes Sustainability	UG	Amer Environ Policy & Politics	SPA-370-001	Public Affairs, School of	This course examines the concept of environmental sustainability and its applications at various levels of governance and to a range of issues.
Includes Sustainability	UG	Leadership	SPA-391-001	Public Affairs, School of	First of all, Section 001 was cancelled; so the active course is SPA-391-002. The way in which this course includes sustainability is two-fold: (a) use of on-line/digital resources instead of printed out materials. For instance, the syllabus is a hyper-linked document on Blackboard; not something handed out. (b) One of the student assignments is to evaluate internship organizations on 5 aspects of ethical leadership. Sustainability is one of the five required aspects of ethical leadership that the students must observe, analyze, and report on.
Includes Sustainability	UG	Intro to Policy Analysis	SPA-396-003	Public Affairs, School of	Relation between economics and policy, with section on environmental policy
Includes Sustainability	UG	Latin Amer: Hist, Art, Lit	SPAN-210-001	World Languages and Cultures	It is a survey course on Latin America, so it includes issues of sustainability of its natural resources, political implications, etc
Includes Sustainability	UG	Spanish, Intermediate I	SPAN-252-008	World Languages and Cultures	this course provides instruction about Grammar, Vocabulary as well as Culture from Spanish Speaking Countries. There is a section that discusses environment
Includes Sustainability	UG	Spanish, Intermediate II	SPAN-253-005	World Languages and Cultures	This course provides instruction about Spanish Grammar and Vocabulary as well as Culture from Spanish Speaking Countries. There is a section that discusses environment
Includes Sustainability	UG	Spanish, Intermediate II	SPAN-253-D01	World Languages and Cultures	there is a section that discuss environment
Includes Sustainability	UG	Business Spanish	SPAN-355-002	World Languages and Cultures	Spanish 490 / 355 (Business Spanish) includes social, economic and political aspects of Latin America. Students learn concepts and read articles related to the importance of microfinance, the impact of working labors, the challenges of different economies around the region. We also work with local Latinos entrepreneurs in the area of Washington
Includes Sustainability	UG	Business in Latin America	SPAN-490-001	World Languages and Cultures	Spanish 490 / 355 (Business Spanish) includes social, economic and political aspects of Latin America. Students learn concepts and read articles related to the importance of microfinance, the impact of working labors, the challenges of different economies around the region. We also work with local Latinos entrepreneurs in the area of Washington
Includes Sustainability	GR	Radical Movements in Latin Am	SPAN-705-001	World Languages and Cultures	A course on resistance movements in Latin America, some of them in response to exploitative policies that go against sustainability
Includes Sustainability	GR	Human Rights & Latin Amer Lit	SPAN-705-002	World Languages and Cultures	This course analyzes the role of the arts in the evolution of human rights discourse in Latin America over the course of the twentieth and twenty-first centuries. Through a range of genres including film, theatre, prose, urban intervention, and student protests, students will examine artistic production as a means of addressing major human rights concerns in Latin America, resulting from state-orchestrated violence, as well as those deriving from inequality and discrimination relating to race, gender, and sexuality. The course also addresses cultural manifestations addressing more recent rights such as identity rights, workers' rights, environmental rights, and children's rights. Through contextualized case studies and analysis of cultural works, students will investigate the relationships between creative production, local politics, and international rights conventions. Throughout the course, students will consider the diverse roles the arts can assume within a human rights framework, such as testimony, memorialization, an alternative channel of information, counter-narrative to official discourse, propaganda, political manifesto, and instrument of change.
Includes Sustainability	UG	AU in the World	SPEX-060-002	School of Prof / Extd Studies	ESL for Chinese and other foreign students
Includes Sustainability	UG	Professional Development	SPEX-065-002	School of Prof / Extd Studies	Hybrid short course for international graduate students to learn about digital footprints and writing norms.

Includes Sustainability	UG	Mentored Field Practicum	SPEX-120-004	School of Prof / Extd Studies	class discussions of internship assignments
Includes Sustainability	UG	Basic Statistics	STAT-202-016	Mathematics / Statistics	Data presentation, display, and summary, averages, dispersion, simple linear regression, and correlation, probability, sampling distributions, confidence intervals, and tests of significance.
Includes Sustainability	UG	The Makengue Project	UCOL-200-016	DAA / Sr. Vice Provost	This course includes a spring break trip to the rainforest in Nicaragua. Many aspects of conservation, sustainability, cross-cultural issues etc., are discussed.
Includes Sustainability	UG	Women's Voices Thru Time	WGSS-150-004	Women's, Gender / Sexuality St	Focus on a range of feminist writing and theories, including ecofeminism
