

3 Steps to Carbon Neutrality

1. Reduce Our Use

Reducing GHG emissions is the most important step AU takes toward carbon neutrality. AU has programs to engage the whole community in practicing sustainable habits.

Zero Waste

Transportation

Green Buildings

Community Engagement

Water Conservation

Energy Saving Programs

2. Use Renewable Energy

Using emissions-free electricity drives down AU's carbon footprint and contributes to sustainable practices.

On-Site and Off-Site Solar

Renewable Energy Credits

3. Offset the Rest

Some sources of GHG emissions can't be completely eliminated, but strategic and innovative offset initiatives allows AU to offset the GHG emissions our community produces.
